

# Vineyard Church of Columbus

## Café Sound Equipment Agreement

- 1. The Vineyard Church of Columbus (VCC) Café is a small venue that not only offers a place for musical acts to perform but also, serves foremost as the church's gathering place encouraging the building of relationships while enjoying great food and beverages. Therefore the main priority is given to the operation of the Café' which will need to possibly limit the performer's level of loudness in order to allow the customer to hear their orders being called for pick up.*
- 2. The Café is not a concert hall, it is a dining / coffee house. Therefore, the sound system reflects the needs of the Café staff firstly and performers secondly.*
- 3. VCC made a substantial investment in the house system and expects it to always be treated with the utmost respect and stewardship. Failure to observe this will result in the offending party losing all future opportunities to perform in the Café using the house system.*
- 4. The Café staffs are not sound technicians and are not responsible for the operation or maintenance of the sound system. If you have any questions, contact the VCC Sound Ministry Coordinator or one of his/her staff @ 614.890.3899.x 405.*
- 5. The VCC Sound Ministry team and the Café do not provide any performers or bands with sound technicians. If you are performing in the Café bring your own sound technician or you may contact a VCC Sound Ministry Technician (ST) to assist you, but they are under no obligation to do so. However, during services the VCC ST's are not available and must not be contacted for assistance, under any circumstances.*
- 6. If you choose to bring your own sound technician, they are only allowed to establish a house and monitor mix. Non-VCC sound technicians are not permitted to modify, re-route, re-wire, or re-configure anything that is part of the Café sound system. Failure to observe this will result in the offending party losing all future opportunities to perform in the Café using the house system.*
- 7. VCC will supply 2 microphones, 2 XLR mic cables, 2 mic stands, one monitor and cable. If you require additional gear then it is your responsibility to bring it.*
